Entertain Newlyweds

A party was held at the Long Coulee school on Friday evening, October 6th, in honor of Mr. and Mrs. Reg. Sasseau. The fore part of the evening was spent in cards, after which lunch was served. A presentation was then made, by Miss Margaret Hanes and Miss Wilma Matlock to the bride and groom, both responding very fittingly. The evening ended with all wishing the happy couple many years of happiness.

BONETTI-THOMASON

A quiet wedding was solemnized at St. Andrew's R.C. church at 8 o'clock on Monday morning, Sept. 18, by Rev. Fr. Cunningham, when Alice Thomason, daughter of Mr. and Mrs. Charles Thomason of Vulcan, was united in marriage to Mr. Dominic Bonetti of Champion. After the marriage ceremony nuptial mass was celebrated during which the bride received the special blessing which the church reserves for such occasions. The bride's attendant was Mrs. M. Popovich while Mr. Charles Thomason Jr. waited upon the groom.—Vulcan Advertiser.

Mrs. Theriault was a Champion visitor this week.

Women's Institute

The October meeting of the Champion W.I. was held at the home of Mrs. Martin Clever. The two high spots were an excellent, comprehensive address on "School" by Mr. Cooper and the silk quilt presented by Mrs. Boner. We are invited to Thigh Hill Friday. Next meeting at Mrs. Beaubier's.

Mr. and Mrs. Joe Tufland of Lethbridge, permanent wave specialists, will be in Champion on Friday and Saturday October 13th and 14th, at the home of Mrs. W. A. McIntyre. Those interested please get in touch with Mrs. McIntyre immediately.

Mrs. Gordon Higgins entertained at a Thanksgiving dinner, when her guests included Mr. and Mrs. Clarence Davis, Mr. and Mrs. Pharis and Miss Kate Pharis.

Mr. and Mrs. D.D. Farmer, accompanied by Mr. and Mrs. McInnes of Calgary, spent Thanksgiving at the home of Mrs. McKinnay at Claresholm.

CHAMPION THEATRE

Wednesday, Oct. 18th

The Man Who Won

Here is a British Picture with plenty of action A story of rural life and featuring

HEATHER ANGEL

The Famous Scottish Actress.

NOTE—We are pleased to present this, the first of a series of British Pictures to be shown in this Theatre.

15 and 25c Show at 8 o'clock

Wednesday, October 18

GOVERNMENT OF THE DOMINION OF CANADA 1933 REFUNDING LOAN

The Dominion of Canada offers for public subscription

Two-year 3½% Bonds, due 15th October, 1935

Issue Price: 99.50 and accrued interest,
yielding 3.75% to maturity.

Six-year 4% Bonds, due 15th October, 1939

Issue Price: 99.00 and accrued interest,
yielding 4.19% to maturity.

Twelve-year 4% Bonds, due 15th October, 1945

Issue Price: 96.50 and accrued interest,
yielding 4.58% to maturity.

Principal payable without charge in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa, or at the office of the Assistant Receiver General at any of the following cities: Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary or Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations

Two-year Bonds, \$1,000
Six-year Bonds, \$500 and \$1,000
Twelve-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

Cash subscriptions will be received only for the Six-year 4% Bonds and for the Twelve-year 4% Bonds. All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, delivery of interim certificates against payment in full for the bonds allotted will be promptly effected.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1933, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 3½% Bonds and the Six-year 4% Bonds.

100% of their par value on subscriptions for the Twelve-year 4% Bonds if effected on or before 15th October, and 100% of their par value after that date.

No accrued interest on the new bonds will be charged on refunding subscriptions if effected on or before 15th October. After that date accrued interest from 15th October will be charged.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$225,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$189,971,850 Dominion of Canada 5½% Bonds maturing 1st November, 1933, and \$40,000,000 short-term Treasury Bills.

The balance will be used for the general purposes of the Government.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open on 10th October, 1933, and will close on or before 24th October, 1933, with or without notice, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE,
OTTAWA, 10th OCTOBER, 1933.

British Market Available

Canada Could Find Up Good Trade For Dressed Poultry

The adjustment of the basis of the British duties on imported poultry would seem to strengthen the Canadian position. Great Britain imports enormous quantities of dressed poultry, but the only extent to which Canada has taken advantage of that market so far was the turkey shipment just before last Christmas. Then the whole lot was bought up at good prices. There is room for extensive development of this trade from Canada, and it is incumbent on the people on this side to show more enterprise than they have done in regard to some other branches of new trade.

To a large extent it is a question of refrigeration. The Canadian use of refrigerator freight cars, cold-storage warehouses, and refrigerator accommodation in ships.

It is announced that Great Britain will import one and a half million dozen Canadian eggs before the end of the year. That is, "in" and with a bit of that "Push and Go" spirit that Lloyd George asked for during the war, Canada could find a market in Great Britain for surplus poultry—provided it isn't salted.—St. Thomas Times-Journal.

Contrast Is Marked

Motorists This Side Of Atlantic Lack Courtesy Found In British Isles

A motorist who has been touring in the British Isles writes to a Canadian newspaper commenting on the courtesy exhibited by motorists in the country. He writes in contrast to the "I'm in a hurry—look out for yourself" attitude, which unfortunately is so frequently encountered on this side of the Atlantic.

There, he says, the driver ahead in a line of traffic is not a hindrance, but it is wise to pass; indicates his every intention, and generally assists others on the road by making clear, as far as possible, what conditions exist.

Such courtesy as this might easily result in a great diminution in the number of traffic accidents. Occasionally, one encounters a similar spirit in Canada, but not all too frequently.

A friendly and polite attitude on the part of motorists could be one of the most valuable factors in reducing the appalling number of automobile accidents in this country each year.—Guelph Mercury.

Smaller Than Famous Midget

Perfectly Formed Little Man Is Only 25 Inches High

The most amazing man in the world—a man who might have stepped straight out of a page from "Gulliver's Travels," is Harold Pyett, of Stockport, and he is the smallest known man on earth. It is possible, even, that he is the smallest human being ever known to live. He is only 25 inches high and weighs 24 lbs. He is 45 years of age. The most famous midget was of course, General Tom Thumb, of Barnum fame, but Mr. Pyett can concede him 12 inches in a height contest.

He is so small that, incredible as it seems, he only reaches to the arm of an average arm-chair.

He is a perfectly-formed little man, with a small grey moustache and a treble voice, and is a trifle bigger than a large doll. When you shake hands with him you have to bend right down as if you were going to pick up something from the floor. Mr. Pyett was called for the Army three times during the Great War, because of his age, but the authorities had rather a shock when they saw him!

Russia Fitted For Aviation Development

Colonel Lindbergh Impressed By Work Being Carried Out

Colonel Charles Lindbergh and his wife are so impressed by the experimental aviation work that is being carried on in Soviet Russia that they hope to return to that country in a couple of years to see for themselves how the experiments have worked out. The Colonel told of this desire at a banquet given in honor of himself and his wife. Two United States senators—W. V. Van Dusen of California, and R. R. Reynolds of North Carolina—were present.

"This country is presently fitted for aviation development because it is a land of great distances," Lindbergh said, "and I am impressed with your accomplishments."

"Breakdowns—physical or economic, individual or national—require time to heal. Complete recovery is not made in a day, week or a month."

Africa will build many new airports.

W. N. H. 1916

DEATH EDICT FALLS ON 2,000 BUFFALO IN ALBERTA

The buffalo herd in Wainwright National Park, Alberta, has increased so rapidly that the Canadian government has sanctioned the slaughter of 2,000 of them. Above is a picture of one small group of the herd in Wainwright Park. The buffalo, in danger of extinction a few years ago, seem to have no ambition in life—to raise a large family—now that they are under the protection of the Government.

Preserving Historical Monument Of West

Pioneer Stone Church In Manitoba

Time is taking toll of "St. Andrew on the Red."

The sturdy old church which claims kinship with the Selkirk settlers and Lower Fort Garry will shortly undergo expert and permanent rebuilding to preserve for history one of the few remaining historical monuments of the west. Great cracks have appeared across the northeast corner of the edifice so that now only a portion of it can be used for worship.

It is two years more than a century since "at a spot called the Grand Rapids, on the banks of the Red River," the drifting of settlers toward a fine hilly and lawned site there impelled the founding of a church. Here the first church of St. Andrew's was built in 1831, the same year in which constructive work was begun on Lower Fort Garry.

The builder of this first church was Rev. Wm. Corkran, afterwards archdeacon. Hand labor and primitive engineering went into its construction and it soon became the central point of the "settlement." Fine buildings housing Hudson's Bay Company officers were built in the locality and the congregation soon swelled beyond the church's capacity. The second church was constructed in 1849.

Mrs. John Norquay, wife of a former premier of Manitoba, still living and within almost a stone's throw of the church, can recall when the archdeacon arose at midnight and staid and solemn went out to turn the first sod, 85 years ago. Eight-ninths of the cost was contributed by the congregation. "Silver and gold had they come," wrote the archdeacon in his diary, "but stones, lime, shingles, timber and labor were dearly contributed."

St. Andrew's stands between Winnipeg and Selkirk on the banks of the Red River. Its tall tower is a landmark for miles around. Within may be seen squares of buffalo skin used by the pioneers who built it as "kneaders." Tourists and visitors to the locality and the grave of the archdeacon who died in 1865 are legion.

King's Favorite Quotations

British Ruler Has Six On Which He Builds His Life

I have been fortunate enough to secure the six quotations upon which His Majesty the King builds his whole life. They hang in his workshop at Buckingham Palace and stand guard. Teach me to be obedient to the rules of the game. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other. Teach me neither to proffer nor to receive cheap praise. If I am contented to suffer, let me be like a well-bred beast that goes away to suffer in silence. Teach me to win if I may; if I may not, teach me to be a good loser. Teach me neither to cry for the moon, nor to cry over split milk. In these there is sentimentality admiring the one and contentlessness which so often characterizes such sayings.

Auto License Examiner—"Madam, if your car stalled on the car track, what would you do?"

Madam—"Phone my husband to come and fix it. He can make any machine go."

The first medical degree conferred in the United States was in 1770.

Wolves from Russia are invading the Vilna district of Poland.

St. Francis And The Birds

Ever Growing Interest Taken In Birds And Their Protection

Following the life of St. Francis of Assisi, who died more than seven hundred years ago, there began a revolution in man's relation to bird life which has never died and which in these latter days is advancing with the creation of bird sanctuaries in all parts of the world. Always there has been a class of disciples, world-wide in extent, whose lives have been devoted and purified by the love of birds and whose inspiration, fidelity, joy and love in the presence of bird life have been sustained and renewed by the immortal memory of Saint Francis of Assisi.

"Thou Saint Francis, bleaser of our wings and songs.

Prince of the morning lark that dreams and sings.

Confessor of the Finches, loving friend of the doves.

Who by thy faith became the Bird's Redeemer."

—Hosford.

From the great mind before which Saint Francis bowed in such exquisite humility, the mind of Christ, there issued some mysterious and mighty power which survives all the centuries, all the bitterness, all the insincerity and the ugly amalgam that has marred the history of the world. In the presence of it, men know that they are in contact with the greatest power in the world, the power of love.

Now, Francis this power was the secret of life and religion and through it his immortality is a pulsing emotion, ever beating in the hearts of all who love birds. His contemporaries are but names in the history of the world. There came little from them that the world needed. From Saint Francis there has issued, as from the mind of Christ, a stream of emotional loveliness which has never run dry and which has cleansed the hearts of men and refreshed their spirits when no other power could avail.

Work Of Radio Commission

Director Charlesworth Refers To Improvement In Standard Of Broadcasting

There has been no middle in anything the Canadian broadcasting commission has done, "the only medium being middle-brained comments in Canadian newspapers," asserted Director Charlesworth, chairman of the commission, in an address opening the Montreal radio show and household appliance exhibition.

"If I went down into my grave tomorrow, I would have nothing to be ashamed of," Mr. Charlesworth said, "nor would I have reason to be ashamed of my colleagues or of our little staff."

Recalling that it was exactly a year ago Saturday that he had been asked to assume his present post, Mr. Charlesworth went on to review the present situation of radio in Canada. "The Canadian radio industry is bound in its fortunes with the Canadian radio industry," he said, "and that industry seemed to be thriving as proved by 'bounding' radio sales, especially in the west where economic distress had been acute."

The first task of the commission had been to clear the air of "quackery, abuse and scurrility." This had been accomplished not by battling against free speech but against infatuation of speech. The commission had endeavored to improve the standard of broadcasting in other ways and this had led to erroneous impressions.

There are rumors in Montreal that we are attempting to drive United States programs off the air," said Mr. Charlesworth, "who is wrong. Before the next year you will be able to hear all the best features of the Columbia broadcasting system and the National Broadcasting Company, together with those of the Canadian radio commission for which no apologies need be made."

Willing To Assist

General Smuts Glad To Help Britain In Any Way

I am told that General Smuts has gone home disappointed by the failure of the Economic Conference, and not expecting it to meet again. But he is not discouraged by the outlook as a whole, and least of all by that of the British Empire. He is greatly heartened by the better prospects in South Africa, where racial feeling is being submerged by political considerations. He believes, he is the best augury for the future of the Union.

The General has many interests and responsibilities in his own country, but his friends regret—though he probably does not—that he has not a larger and more active stage for his great abilities. All the same, it may be assumed that, whenever his services are required by the Home Government, he will, as in the past, be cheerfully and effectively given.—London correspondent to the Ottawa Journal.

Shingles Over Century Old

Found In Good Condition On Church Built In 1814

A record in wearability is believed to have been established by more than half a dozen well-preserved shingles, which were removed recently from the steeple of the Allin Congregational church in Dedham, Massachusetts, by Milton J. Rogers, carpenter, who is now engaged in repairing the steeple. The shingles, according to Rogers, may be 119 years old, as there was no evidence when the shingles were removed that any others had ever been used. Since the church was built in 1814, according to Rogers, the original nail holes through the shingles were the marks on the wood under the shingles.

Must Be From South

A strange bird with a "southern drawl" is occupying the attention of Gotham representatives of the United States biological survey. William H. Miller turned the bird over to a pilot after it had dropped on his lawn from exhaustion. The bird is brown and black, with a long black beak and long black tail. It has not yet been definitely identified but experts agree that it is a southern species because it whistles with a drawl.

"How can I get my husband to discuss his business affairs with me?" inquires a correspondent. Ask him when he intends to buy a new car.—London Humorist.

It is estimated that 28,000 of the town automobiles visit the Chicago World's Fair daily.

Canton and Ichang, China, are to be connected by a new highway.

May Soon Be Necessary

Separation Of Passenger And Mail Service On Empire Air Routes

The time will come when the desirability of separating mails and passengers may have to be considered. In the United States the system was introduced some years ago, but the cost to the State in indirect subsidies has been considerable. Experiments are at the moment being carried out in England with a mail carrier, with a range of 1,000 miles, at a cruising speed of over 150 m.p.h. and with a range of 1,000 miles. With such a machine, mails could be conveyed from England to India in three days and to Australia in six days. As passenger traffic increases on Empire air routes, the justification for carrying the mails separately will naturally become greater. But an earlier development, in all probability, will be the speeding up of existing combined passenger-mail services between England and the Dominion, and the running of them twice a week. The advantages of a more frequent service need not be emphasized.—Calcutta Statesman.

Circle Highway

Motor Road From Calgary Through Rockies To Edmonton

Calgary Board of Trade has decided to extend their support to efforts aimed at securing completion of a city highway through the Rocky Mountains, making it possible for tourists to motor from Calgary through the Rockies to Edmonton. Edmonton and Jasper Chambers of Commerce interviewed Calgary Board of Trade members to obtain their support for completion of the Jasper-Edmonton link of the proposed highway by the government as a relief measure.

Some Curious Habits

The curious things that great men do are just as likely to be interesting as the evil or the good. Thackeray lifted his hat every time he passed the house in which he wrote "Vanity Fair." Dante trained a cat to sit on the table and hold a lighted candle between his paws while he read. At the first night of his play "Mr. H." Charles Lamb blazed louder than anyone else. Dante Gabriel Rossetti buried in the grave of his young wife the manuscript of a book of poems which he afterward was prevailed upon to have exhausted and published.

Talkies are being made in Turkey.

FANCIFUL FABLES

Saw Sons Reach Presidency

How many parents will be watching their sons' progress? Right women! Sarah Delano Roosevelt, Mary Washington, Susanna Adams (second president's mother), Nelly Madison, Jane Polk, Harriet Grant, Ellen S. Garfield and Nancy McKinley. Five men: John Adams, Richard Taylor, James Madison, John Coolidge and George T. Harding.—From the Pathfinder.

He—"If you don't accept me I shall throw myself under the 6 o'clock train."

She—"Give me time to think: there is another train at 6:15."

Until the middle of the 19th century, coal-rail was regarded as a waste product and thrown away.

Bird Banding in Canada Provides Valuable Information In Tracing Movements Of Wild Life

The economic importance of wild birds and their relation to man's welfare is being more widely recognized, and by bird banding the store of knowledge of their movements and habits is gradually being extended. In order to take proper steps toward conservation, by the enactment of good game laws, properly located bird sanctuaries, and other means, it is essential that as much exact scientific information as possible be available concerning all species of native wild birds.

Scientific bird banding as a means of studying and solving the many varied problems relating to the migration, range, breeding grounds, and general life histories of wild birds is conducted in full co-operation between the National Parks Service of the Department of the Interior, Canada, and the United States Bureau of Biological Survey at Washington, D.C. Most of the banding work is done by voluntary co-operators throughout Canada and the United States.

The general public is urged to aid in the work by watching for bands on the legs of any birds that may come into their possession and to report the finding of such bands to the nearest National Parks Service office, giving the number on the band, the date on which the bird was taken, as well as the location and character of the bird was killed, found dead, or captured alive.

All official bands are of aluminum or copper and are inscribed with a serial number and with a letter designating the year. There is reason to believe that each year, many bird bands are recovered, but for various reasons not reported to the Department. Recently, official bird bands recovered from wild birds have been hanging on nails, strung together as necklaces used as toys by children, and in many curious places in wilderness and civilized surroundings.

Bird banding may be carried on only under Dominion permit and none but official bands may be placed on wild birds. Full information as to the manner in which bird banding is being conducted will be gladly furnished persons who are interested, upon application to the Commissioner, National Parks Service, Department of the Interior, Ottawa.

Radio Stations Guide Ships

Thousands Of Direction Cuts Are

An instance of the work done by Canadian government wireless stations in guiding North Atlantic shipping is provided by the Chebucto Head direction-finding station at the entrance to Halifax harbor. A yearly average of 4,000 to 5,000 calls from ships off the coast are answered by this station. Since its establishment in 1917 the number of wrecks along this section of the coast has greatly decreased.

Located nine miles from Halifax, the Chebucto Head Station was erected by the Department of Marine for the purpose of giving bearings to ships and handling commercial messages. A staff of five maintains 24-hour service.

Other stations are located at Sable Island, St. Paul, Canso, Yarmouth, Red Head, N.B., Cape Race, Nfld., and Father Point, Que. Operators are transferred at one or two year intervals.

Canada's Maple Trees

Not Only Ornamental But Have Great Monetary Value

The maple tree, the best of which is the national emblem of Canada, is not only a notably fine ornamental tree, but also has a unique monetary value apart from its value as lumber. The production of maple syrup and maple sugar in Canada this year was 1,262,315 gallons of syrup valued at \$2,559,028, and 5,786,126 pounds of sugar with a value of \$469,713, the combined value being \$3,028,741. Most of the maple syrup and maple sugar produced in Canada comes from the Province of Quebec, with Ontario in second place. Small quantities are produced in Nova Scotia and New Brunswick. These products are derived from millions of maple trees which are tapped in the month of March each year.

Wines, liquors and cigars sold after dark in Bratislava, Czechoslovakia, are now subject to a special tax for the benefit of the unemployed.

Front has damaged some early crops in Argentina recently.

GEYSERS AS SOURCE OF ENERGY: AN ITALIAN PROPOSAL

Our photograph shows a new geyser which has just made its appearance in the borax-bearing district of Lardero, in the Val di Coccia, Italy. The Italians are considering a suggestion that it should be used for electrical energy for the railways.

Offers Every Convenience

Westminster Replaces Civil Marriage

Two famous civil marriage registries, in London, England, scene of many a wedding of peer and state star, film notable, cosmopolitan or otherwise, have themselves contracted a union. The old, gloomy office in Princes Row, Westminster, and the equally dilapidated office in Henrietta Street, Covent Garden, have been succeeded by a brand-new building at Caxton Hall, Westminster.

The oak-paneled hall in the new building leads to no fewer than seven rooms where the knot can be tied with efficiency and dispatch in the presence of anywhere from half a dozen to a half a hundred spectators. Should a reception follow, every convenience is afforded for a spread equaling a west end hotel dinner or merely bottled beer and sandwiches.

An Anglican clergyman is partly responsible for this move for bright civil marriages. Rev. E. Schomburgk, vicar of St. Andrew's, Ashley Place, as Mayor of Westminster, presides over the Westminster City Council which inaugurated the change.

"People who get married in church just to have an imposing background, and who care little for the beauty and solemnity of the actual service, can get all the pomp and circumstance they want here," he says. "I shall not mind foregoing a lot of fees if this new office takes some of these people off my hands."

Rayon mills of Mexico are operating three shifts a day.

"We've simply got to get him up somehow, it's his turn to do the dishes." The Humoral, London.

Western Provinces Account For More Than Half Of Acreage In Canada Devoted To Oats

The cultivation of oats is of more recent date than that of wheat and barley. While the origin of the cultivation of wheat can be traced in all probability to a warm climate and that of rye to a cold climate, oats were found occupying an intermediate position. It is not possible to find any record of their use by the ancient peoples of Egypt, Palestine, Greece, Rome, India or China. Probably oats were cultivated at an early date by people who inhabited east-central Europe, and some historians point more definitely to Tartary in Western Asia as the probable place of their first cultivation. Oats were less important than wheat, barley or rye in the early development of western Europe, but came into much greater use with the civilization and expansion of the central and northern (temperate) portions of the continent. The crop, being particularly suited to the cool, moist climate, became a leading cereal.

During the many other uses besides that of food for man, the oats crop has continually expanded in natural sequence of crop cultivation. At first only such crops were grown as would serve for human food and natural meadows provided sufficient forage for the animals. With increasing population more and more ground was devoted to the production of cereals for human consumption. The oats crop has become an increasingly important part of husbandry, especially in temperate regions.

On the basis of acreage and tonnage produced, oats rank second only to wheat. In 1932 the acreage of wheat in North America was \$2,400,000 acres, and yielded 1,164,000,000 bushels, while in Europe, excluding Russia, 83,500,000 acres produced 1,485,000,000 bushels. Oats sown in Europe on 4,320,000 acres yielded 1,658,000,000 bushels and in North America from 42,200,000 acres 1,828,000,000 bushels were produced. This was 2,649,000,000 bushels of wheat from 168,300,000 acres and 3,486,000,000 bushels of oats from 96,500,000 acres. In Canada oats weigh thirty-four pounds to the bushel and yield sixty pounds. The United States bushel of oats is thirty-two pounds.

While the area sown to oats is considerably less than the area sown to wheat in North America and Europe, production of oats in bushels, exceeds that of wheat by about 800,000,000 bushels due to higher yields per acre. On a tonnage basis, however, the production of wheat exceeds that of oats by a considerable margin.

Oats are produced over the whole area but heaviest production is found in the middle western areas of the United States, Canada, the United Kingdom, France and Russia. These six countries produce about seventy-five per cent. of world production of oats.

The nature of the disposition of the world production of oats is indicated by the fact that although world production amounts to about 4,500,000,000 bushels, world trade in oats amounts to only about 100,000,000 bushels, or slightly over two per cent. of production. Therefore, the great bulk of world production of oats is consumed at or near areas of production.

The chief use of oats is as a feed to livestock. Oats are the standard feed grain for horse and, alone or in combination with other grains, are used as a feed for cattle, sheep, hogs and poultry. In spite of a high percentage fibre content, oats are relatively high in protein and fat. Oats rank with wheat in protein content and are higher than wheat and barley in fat content.

The area sown to oats in Canada in 1932 amounted to 13,148,000 acres compared with an area of 37,182,000 acres sown to wheat; 3,757,000 acres sown to barley and 778,800 acres sown to rye. In other words, of the total area sown to the four leading cereal crops 29.3 per cent. was sown to oats.

According to the estimate of 1932 cereal production, production of oats in Canada amounted to 391,563,000 bushels compared with wheat production of 428,514,000 bushels, barley production of 80,773,000 bushels and rye production of 8,938,000 bushels. Converting the foregoing production figures to a tonnage basis, total production of the four cereals amounted to 21,700,464 tons of which 6,655,500 tons or 30.7 per cent. consisted of oats.

Reports to the Dominion Bureau of Statistics show 33.3 per cent. of 1932 acreage sown to oats in Saskatchewan.

hatchery, 30.6 per cent. in Alberta and 11.2 per cent. in Manitoba. The prairie provinces accounted for 65.1 per cent. of the total Canadian acreage sown to oats in 1932. Ontario and Quebec had 17.8 and 13.1 per cent. respectively. The balance 4.0 per cent. was distributed among the Maritime provinces and British Columbia.

It is noted that there is a tendency toward decreasing consumption of oats in Canada in recent years. Many causes have contributed. One of the most important factors in the decline has been the introduction of power machinery in western Canada. During the years 1924 to 1928 or 1929, the tractor displaced the horse to a considerable extent, especially in areas where oats are not considered a favorable crop. The tractor not only displaced the horse from the farm, but in many cases replaced the horse to a pasture diet. It is probable that the number of horses resident in cities has also decreased in recent years owing to the mechanization of delivery systems. Further, the use of oats in Canada has been somewhat retarded by the increase of feeding of barley to livestock in efforts to promote the use of barley as a feeding grain.

During the past seven years the United Kingdom has imported an average of 23.4 million bushels of oats per year. The Canadian share of the United Kingdom's requirements about 4.6 million bushels or slightly over 20 per cent. of total imports into the United Kingdom. The United Kingdom has absorbed slightly over 40 per cent. of total Canadian exports of oats during the seven years.

Annual Loss Is Heavy

Destruction By Rabbits In Australia

Estimated Loss In Millions of Pounds. Pointing out that Australia is now conducting its annual campaign to exterminate rabbits, Vice-Consul R. H. Hunt calls attention to the havoc wrought in the Commonwealth by this prolific pest.

He estimates he points out, that the destruction caused by the rabbit amounts to between 20 and 40 million pounds sterling annually, a sum about equal to the country's national debt. Not only is the loss computed on the damage done to crops, but on the reduced carrying capacity of the land, the loss of stock in drought years caused by the rabbits eating out the native herbage and bush which normally would sustain the stock, and the loss of water in dams and other conserves through banks weakened by burrows.

A fairly substantial export trade in furs and caracases has been developed into Australia from England in 1930. By the end of the nineties they had invaded every section of the Commonwealth.

Rabbits and hares were introduced into Australia from England in 1858. By the end of the nineties they had invaded every section of the Commonwealth.

The Weekly Newspaper

Is Taken Home And Read By The Whole Family

An Alberta weekly newspaper notes that when a lot of country people in its province go to the post-office for their mail they litter the office with a lot of mail material, but never with the newspapers they receive. It notes that circulators and much matter are constantly and abundantly consigned to the floor, but that newspapers are accorded infinitely greater respect. They may be considered a kind of talisman, but never until after they are taken home and read by the whole family, including hired help.

This is true, as is also readily explainable. The newspaper carries much of interest and value. It mirrors the great world with which it is not only a welcome visitor, but a welcome institution in the home. Furthermore, its cost is relatively tiny. Regina Leader-Post.

A plan is being made in Brazil for a reduction in radio license fees to the unemployed.

Harvests in Mexico this year have been rather poor.

Little Help For This Week

"Whoso putteth his trust in the Lord shall be safe." -Proverbs 29:25.

There is a God who is the Father of us all, who is the Father of all things that performeth all things for us." -Psalm 67:2.

To any who realize heaven keeps all things, and that the Father of all things will take whatever His gracious will is, and that He will do all things for us. Nor doubt our inmost wants are known to Him who chose us for His own.

—J. Neumark.

If we have brought us into this world, and have departed it is that we are not fit to cope with it, which we have prepared for us, that we should be very utterly unaided for any more things to be brought into this world. In this time we are to live and wrestle, and no one else. It is a humbly knowledge of all this, and that the Father of all things could go back ten degrees, or that we could go back with it. If any time have departed it is that the difficult time may make us more in earnest; that they may teach us to be more diligent in the things of God.

Three-Year Silence Broken

Wireless Contact Established With Mounties in Arctic Post

A three-year silence of the Arctic was broken when Royal Canadian Mounted Police headquarters established wireless contact with Canada's far northern police post from Barce Peninsula, 750 miles from the nearest town. It was reported Corporal H. W. Hamilton, and Constable H. W. Hamilton, and the wireless station was set up in the Arctic world in three years of lonely Arctic post. Barce Peninsula, one of the most isolated places in the north, has been evacuated, the post being moved to Craig Harbor because of difficulty of transporting supplies.

Girl Repairs Famous Clock

Accomplished Task Which Baffled New York's Male Clockmakers

A twenty-year-old girl accomplished a task which had baffled New York's best male clockmakers and the Hotel Martinique's famous 300-year-old clock again is ticking after being silent for a week.

The girl, Miss Louise Weyer, of Astoria, La., fixed the \$50,000 clock's stopping for the first time since it was placed in the hotel's lobby in 1911, and of the absence from the city of clocksmiths who regularly tends it.

She volunteered her services, donned a smock and soon had the clock operating again.

MAKES STRONG PLEA FOR TOTAL DISARMAMENT

Instating, England.—The Labor Party pledged its strong reluctance to any war, passed a resolution favoring the total disarmament of all nations and heard Arthur Henderson declare the participation of the United States and Russia is necessary in peace conversations sponsored by the League of Nations.

"The road to Washington and Moscow lies through Geneva," said Mr. Henderson, chairman of the world disarmament conference, in explaining that the league is the only instrument for peace organization. He won cheers when he said, "we must abolish the national equipment and institutions that made war possible and the private interests that lived by war."

The party's attitude toward war was supplemented by the equally strong views in the disarmament resolution. This motion favored not only total disarmament of all nations but also the creation of an international police force.

Lower Empire Duties

Australia Takes Steps To Encourage Trade With Empire

Canberra, Australia.—Prime Minister Joseph A. Lyons, of Australia, announced in his budget report, implementing tariff changes which will give goods from Canada and the United Kingdom added preference in the Australian market. The added preference, he said, will be effected through reductions in preferential tariff rates and in prime duties charged on empire products.

Details of proposed reductions in British preferential tariff rates were not revealed, but it was pointed out both these and the prime reductions would enable empire goods to enter Australia at lower rates.

In addition to containing announcement of reductions in income taxes, the budget showed an excess of receipts over expenditures of £2,547,000 for the year ending June 30, 1933. Total revenue for the period amounted to £75,513,000 and the expenditures totalled £69,965,000.

Farmers Protest

Charge Discrimination In Removal Of Pegged Minimum Price

North Battleford, Sask.—Charging discrimination against the farmers of northwest Saskatchewan in respect to the removal of the pegged minimum price, wheat pool delegates in session at North Battleford despatched the following telegram to Premier R. B. Bennett: "Wheat pool delegates in session at North Battleford representing northwest Saskatchewan, emphatically request that strenuous action be taken to stop falling minimum wheat market."

"Renewed pegged minimum price discrimination against northern farmer. Lower prices destroying confidence in the London agreement. "Believe national marketing board is the only solution. Volume, daily exports, should not be a factor, as 200 million bushels guaranteed for next year."

May Arbitrate

Wage Dispute Between Winnipeg Street Railway And Employees Still Goes On

Winnipeg, Man.—Unable to find a basis on which to settle the wage dispute existing between the Winnipeg Electric Company and its traffic employees the conference which has been going on between the company's officials and the negotiating committee of the street railway employees' unit of the One Big Union stood adjourned. No suggestion was made as to be expected now an arbitration board of five members will be appointed as approved by employees in their strike ballot to further investigate the dispute.

Think Port's Future Assured Churchill, Man.—With the restoration of normal crops the future of Churchill is assured, grain men in this northern Manitoba port believed. Despite a temporary setback received when lower lake freight rates were put into effect, sailings equal to last season's record number, carried a greater quantity of grain to overseas ports.

American Aeroplanes

American aeroplanes were recently sold to Switzerland's leading air transport company.

W. N. U. 2015

Lake Carriers Want Coastal Laws Amended

Claim Higher Rates And More Wharf Shipments Needed

Ottawa, Ont.—The lake carriers are making a vigorous effort to persuade the Federal Government to proclaim the amendment to the coastal laws enacted at the last session of parliament.

It is being urged that unless higher rates can be obtained on the Great Lakes and a larger volume of what was available for Canadian owned ships there will not be a solvent company left in the business this fall.

Under the amendment the transshipment of wheat at Buffalo would be stopped, unless carried through-out in Canadian bottoms.

The lake carriers have met a favorable reception at Ottawa. They desire the amendment to be proclaimed now in order that they will reap the maximum advantage on the autumn wheat trade. Apparently most of the cabinet ministers are favorably disposed, but the final decision will be learned next week from Premier R. B. Bennett. He is said to have requested numerous memoranda giving both sides of the case but has not yet indicated what will be done.

Paris Papers Criticize French Foreign Minister

Making Too Many Concessions To Germans Is Complaint

Geneva, Switzerland.—Criticism appeared in Paris newspapers to the effect that Joseph Paul-Boncour, the French foreign minister, was making too many concessions to the Germans, especially regarding the size of the French army, was said to have decided him to go to Paris and consult with the cabinet.

Revelation that a French statesman had conferred with the secretary of Germany's military propaganda, Paul Joseph Goebbels, was said to have excited some of the French leaders.

M. Paul-Boncour told the assembly of the League of Nations that the four-power European peace pact of Great Britain, France, Italy and Germany strengthens the Locarno pact.

Fascist Party Being Developed In England

Young People Studying Movement States Hon. Herbert Greenfield

Calgary, Alberta.—Within three or four years at the present rate of development, England would have a Fascist party that would be a power to be reckoned with. Hon. Herbert Greenfield told the young men's section of the case of England. Greenfield was formerly agent-general for Alberta in London, England.

Unemployment and economic pressure is driving England's youth into the ranks of the Communist and the Fascist, Mr. Greenfield declared. The young men's section is given a broad study to conditions and problems and new movements are springing up.

U.S. Veterans Parade

Col. Lafesse Witnesses Impassioned Spectacle In Chicago

Chicago.—Like a moving human spectrum, dazzling in color, awe-inspiring in magnitude, the American Legion marched 160,000 strong down broad Michigan boulevard.

Then the grand parade of American "Buddies" took their part in the Great War, along with their women's auxiliaries aware into the Soldier Field amphitheatre to be reviewed by an assemblage of distinguished persons, Col. L. R. Lafesse, Canada's deputy minister of defence, among them.

The march past, which lasted for 10 unbroken hours, was the lone legion activity on the 15th annual convention program.

Dismissed By Nazis

Grandson Of Mendelssohn Loses Position In German University

Hamburg, Germany.—Professor Albrecht Mendelssohn Bartholdy, grandson of the composer Mendelssohn, has been dismissed from the University of Hamburg and the Institute of Foreign Affairs, of which he was head.

Famous in international law, Bartholdy was dismissed because of his Jewish nationality. He was a pioneer in agitating against the Nazis of Germany's sole war guilt. His grandfather's music is no longer played nationally.

Gerhart Eisner, a noted Jewish professor of civil law decorated in the war, also was dismissed.

Will Balance Budget

Conditions In Britain Show Good Improvement

London, Eng.—Neville Chamberlain, Chancellor of the Exchequer, told a group of bankers Britain's budget would be balanced this year and that undoubtedly the situation in the United Kingdom offered a more favorable prospect than it did a year ago.

"There is no sign of an approaching doom," said Mr. Chamberlain, "but on the other hand in almost every direction we see indications of definite progress and a growing sense of the confidence that this is no mere flash in the pan, but the beginning of a permanent advance."

The Chancellor said it seemed likely Great Britain ultimately would return to the gold standard.

"But," he continued, "we in this country cannot count on the UK currency to gold until we are certain that the conditions prevailing are such as will permit the gold standard to function efficiently."

Movies In Churches

Bishop Of London Has Approved Showing Religious Pictures

London, Eng.—With the approval of the bishop of London, "moving pictures" are to be shown in churches and mission halls throughout his diocese. The films will include scenes from the life of Christ, the last days of Livingstone, the martyrdom of Becket and incidents of missionary life. A traveling preacher will go round with the movies, and in due time it is hoped to elaborate this scheme by the introduction of a series of "talkies."

CANADA NOW ON THE ROAD TO RECOVERY

Ottawa, Ont.—Reasons for the optimism Canada is now on the road to recovery are set forth in a statement with which Prime Minister R. B. Bennett will launch the campaign in connection with the refunding loan which will be offered to the public this week.

"With due precaution against unwarranted optimism I think I may say that in Canada we are now on the road to recovery," the Prime Minister declared.

The events of the past six months appear to demonstrate with increasing clarity that the downward trend has come to a definite stop and that an upward trend is now in progress. Mr. Bennett turns to the latest statistical reports on industry and trade. These records, he believes, show that Canada's general economic condition reached its lowest point during the month of February last, and that "to-day we are definitely above that level following a recovery which has been gradual but persistent and unmistakable."

Available records of industry since April show that 116,000 have been added to the payrolls while estimates based on these partial reports place the entire increase in employed persons since that date at 246,000.

External trade figures are also given as proof of the upswing. Both exports and imports have increased and Canada's surplus of exports over imports during the 12 months ended with August of this year totalled \$114,000,000.

"All these facts and figures I think may be quite safely taken as signsposts on the road to recovery," the Prime Minister declared.

FEWER ON RELIEF IN B.C.

Victoria, B.C.—Number of persons on relief in British Columbia decreased by 43,247 from the end of March to the end of August, dropping from 132,838 to 89,591. The decrease in August figures from those of July was 8,491, from 98,075 to 89,584.

SUZANNE SHOWS HOW IT'S DONE

Here we see Mlle. Suzanne Lenglen, famous French lawn tennis star, demonstrating a stroke in lawn tennis to some young enthusiasts in London. She is seen wearing an unusual creation which consists of a frock with which knickers are combined.

ONTARIO'S ATTITUDE

Hon. W. G. Martin, Minister of Public Welfare in Ontario, who stated that there is very little likelihood of Ontario adopting in the near future any policy of sterilization for mental defectives.

U.S. Unions Backing Canadian Rail Workers

Full Support Pledged In Dispute Over Wage Cut

Cleveland, Ohio.—A. F. Whitney, chairman of the Railway Labor Executives' Association, said the organization's full support had been pledged to Canadian railroad workers in their campaign against a second 10 per cent wage reduction.

Representatives of the Canadian railroads conferred with rail-labor officials in his office on June 1. Mr. Whitney said, and at that time a resolution was adopted providing all legal expenses of the Canadian anti-reduction campaign would be paid by the railway labor unions and any other needed support would be given.

The resolution, Mr. Whitney said, provided the association should "go as far as possible" in aiding the workers of the Dominion, many of whom, he said, were receiving wages approximately 17½ per cent lower than rail workers in the same capacities in the United States.

The rail unions have approximately 14,000 members in Canada, Mr. Whitney said.

A Strange Phenomenon

Lake Superior Village Inundated By Action Of Waves

Rosport, Ont.—A wall of water, believed to have been thrown up by earth tremors, under Lake Superior, flooded shorelines and carried away fishing docks at this fishing hamlet. Bay waters receded more than 100 feet, leaving boats moored to the docks suspended in the air. On the lakeshore, buildings along the bay shoreline were flooded and considerable damage done. The unusual phenomenon occurred several times.

Peculiar action of the water left the lake bottom fully exposed and docks and boats high and dry. Each morning with succeeding waves rushed back with great force, breaking inland for some considerable distance. No lives were lost.

Rosport is situated 100 miles north of Port Arthur.

FEWER ON RELIEF IN B.C.

Victoria, B.C.—Number of persons on relief in British Columbia decreased by 43,247 from the end of March to the end of August, dropping from 132,838 to 89,591. The decrease in August figures from those of July was 8,491, from 98,075 to 89,584.

British Steel Plants Busy

News From Sheffield Regarding Business Is Cheering

London, Eng.—Cheering business news came from the United Kingdom's heavy industries, particularly from Sheffield, centre of the steel industry.

C. J. Walsh, just installed in the historic office of master cutter of Sheffield, reported plants in that city are producing more steel than in previous years and that the monthly output is 27,000 tons more than a year ago. A considerable share of this improvement, Walsh said, was a direct result of the tariff on imported steel.

He added Sheffield's new products such as magnets, razor blades and stainless steel had made great strides during the last year.

Supervised Farming

President Beatty Of C.P.R. Favors This Idea

Winnipeg, Man.—Supervision of farming in western Canada is essential to the improvement of farm practices generally and is a necessary incident to any federal immigration scheme in the opinion of E. W. Beatty, K.C., president of the Canadian Pacific Railway. "Farm management," he said, "is a soldier who is an important factor in the success of farming operations in Manitoba, Saskatchewan and Alberta," Mr. Beatty said.

DOLLFUSS HAS NARROW ESCAPE FROM ASSASSIN

Vienna.—The step-grandson of an emperor's dentist, wielding a diamond pearl-handled revolver, came within an ace of killing Chancellor Engelbert Dollfuss and plunging Austria into European politics into new and more dangerous confusion.

As it was, however, the two bullets from the gun of Rudolf Dertl, former corporal in the Austrian army, only grazed the chancellor's left breast and wounded him slightly in the right arm. Dollfuss, after receiving treatment at a hospital, went home within an hour.

Socialist newspapers headlined the accusation that Dertl was a Hitlerite, while, on the other hand, the Dollfuss newspaper Westblatt identified him as a member of the Schutzbund, the dissolved Socialist military organization.

Whatever Dertl's political camp, however, his two bullets were water on a duck's back as far as the diminutive Dollfuss was concerned. A few hours after the attempt, the little chancellor—four feet, 11 inches tall—was standing in his pyjamas at home delivering a nation-wide address assuring the Austrians he was still up and fighting.

Dollfuss thanked God for the fortunate escape of the attempt on his life, coupling this with an expression of firm determination to proceed with his patriotic mission. He explained that he took the occasion to make the speech so as to shut off any exaggerated reports of his injury which might circulate.

"That was a close one," was the comment of the chancellor as he left the hospital to return to his home.

The attack was staged at the entrance to the parliament building. As Dollfuss approached, Dertl moved up, apparently with the intention of handing him a manuscript. Police intervened, however, and seized the document. Thereupon, the former corporal stepped back a few paces, drew his gun and fired.

The chancellor was rushed to the hospital.

The doctors began rounding up political leaders, leading to the belief in some quarters that drastic action would be taken against both the Nazis and the Socialists was impending.

Obligation Rests With Four Western Provinces

Domination Government Has No Control Over Refunding Timber Dues

Ottawa, Ont.—The obligation to refund timber dues rests with the four western provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and not with the Dominion, under the terms of a judgment handed down by the supreme court of Canada.

In its judgment the court dealt with a reference made to it by the Dominion Government. The reference developed from a dispute between the Dominion and the western provinces concerning dues paid by homesteaders for the privilege of cutting timber on their lands for commercial purposes.

British Steel Plants Busy

News From Sheffield Regarding Business Is Cheering

London, Eng.—Cheering business news came from the United Kingdom's heavy industries, particularly from Sheffield, centre of the steel industry.

C. J. Walsh, just installed in the historic office of master cutter of Sheffield, reported plants in that city are producing more steel than in previous years and that the monthly output is 27,000 tons more than a year ago. A considerable share of this improvement, Walsh said, was a direct result of the tariff on imported steel.

He added Sheffield's new products such as magnets, razor blades and stainless steel had made great strides during the last year.

Ordered To Kill Looters

Steps Taken To Preserve Order At Havana

Havana.—Four persons met death as today broke out along the waterfront section of upper Havana during the height of the second phase of a tropical storm which lashed over the city.

There was wild firing when patrolling soldiers sought to disperse groups of looters. A soldier was fatally wounded, a sailor was killed and two negroes were shot to death.

Throughout the city the assembling of groups was strictly under attack. Headquarters announced all available soldiers and sailors had been posted in the city under attack. Looters were told to kill looters and suspicious looking persons.

Along the waterfront drive the water was three feet deep with sea running high and waves dashing over the sea walls.

Since the storm was moving slowly, the national observatory predicted gales would again sweep Havana. Wind velocity reported a maximum of 82 miles per hour.

Farmed In Peace River

Former Westerner May Be Scottish National Labor Candidate

Kilmarnock, Scotland.—Kenneth Lindsay, who farmed in the Peace River section of Alberta 10 years ago while studying emigration, may be the national labor candidate in the Kilmarnock by-election. Lindsay has also returned in Canada and he was the first labor president of the Oxford union.

The by-election is due to the appointment of Craigie Aitchison as lord justice-clerk. The only National Laborite elected in Scotland in the last general elections. He had a majority of 8,036 in a straight fight with Labor.

British War Debts

Reported That U.S. Government Plans To Make Reductions

New York.—The Washington edition of the Journal of Commerce says it is indicated that the United States government will embark upon a new monetary policy that will reduce foreign debt obligations to conduct appropriate negotiations looking to settlement of the war debt question.

It is further manifest, the correspondent reports, that a substantial scaling down of the British debt may be effected. "The chief domestic problem being as to how this may be accomplished without bringing important adverse repercussions to the Roosevelt administration."

Keeping Within Estimate

Toronto, Ont.—Hon. E. A. Dunslop, Ontario provincial treasurer, has announced the government's plan to cut down continental ordinary expenditures by \$4,000,000 had been carried to a successful conclusion and the ordinary expenditure for 1933 would be well against both the Nazis and the Socialists was impending.

The \$4,000,000 had been carried to a successful conclusion and the ordinary expenditure for 1933 would be well against both the Nazis and the Socialists was impending.

DEATH TOLLS HEAVY IN FIRE AT LOS ANGELES

Los Angeles, California.—Twenty-six bodies were recovered from the ruins of a disastrous fire here in Griffith Park, the city's main playground, a 27th victim died in a hospital, and fire officials expressed belief no others had perished after they "nearly every foot" of the burned area had been searched.

Most of the killed died and the more than 125 injured were trapped in a box-like canyon. The wind whirled and sent the flames toward them. Scores of horror followed as they struggled to escape. More than 1,000 acres of park land were burned over.

Fire and police officials at last attributed the fire to a carelessly discarded cigarette or match. Later, Hollywood detectives arrested Robert D. Barry, 29, for questioning after he had been found, they said, near the scene of some small new blazes started early Wednesday.

The officers said Barry admitted he started a fire in Griffith Park at 10 o'clock at night, but denying having been responsible for the main fire, which began burning nearly eight hours earlier.

While the mayor and district attorney started official investigations, Coroner Frank Nance announced that an inquest will be held.

A REMINDER

A few years ago thousands of Alberta farmers
Petitioned and worked for the building of
Alberta Pool Elevators. As a result the Pool
system covers the Province in a close network.
The reasons which inspired grain growers to ask for
the service and protection of this co-operative system
of elevators suggest that patronage should continue
to be extended to them on a generous scale.

In Memorium

In loving memory of our dear
Eva, who fell asleep October
15th, 1901.

God took a loved one from
our home,
But never from our hearts.
She lives with us in mem-
ory still,
And will till life departs.

'Tis sad, yes true, we wonder
why,
The best are always first to die.
Sadly missed by her mother,
father, and sister Flora.

Divine service will be held at
Yatwood on Thursday evening
at 8 o'clock October 19th.

Rev. Peter Dawson begins
his fourth year of ministry in
Champion on Sunday, Oct. 15.

Vulcan, Carmangay, Barons and
Champion schools are competing in
an athletic field meet at Carmangay
on Friday, October 20th, commencing
at one o'clock. Come and give your
school a boost.
